

6-19-15

We are excited to announce the upcoming equipment refresh for DCFS Day Care Licensing staff. Day Care Licensing Representatives will receive a state-of-the-art HP 612 ProX2 touchscreen detachable tablet as well as a portable printer device, new 22 inch desktop monitor, docking station, keyboard and mouse. Supervisors and managers will receive everything except a portable printer. The detailed training schedule is now posted for statewide Day Care Licensing on the Mobility Project website>Windows 8.1 for Laptop Users>Training Schedule and Registration>Day Care Licensing schedule. **Day Care Licensing staff laptop users are required to bring their old laptop/bag to their scheduled training session in order to receive their new tablet/portable printer at training.** If you are using a desktop PC, OITS staff will reclaim it when they are onsite installing new monitors and docks. This equipment refresh will NOT impact Day Care Licensing clerical.

The Windows 8.1 laptop training sessions are currently available for enrollment on VTC. The VTC class name is **Mobility Project (Tablet/Portable Printer).**

DCFS is committed to providing our staff with the tools necessary to perform the job.

Thank you in advance for your support of the Mobility Project.
